

HYCOTE
THE PERFECT FINISH

Scan here for
“how to”
hints and tips

www.hycote.co.uk

CAR COLOUR SELECTOR A-Z

150ml gives the same square metre coverage as a 300ml can*

Up to
twice the
coverage

HANDY HINTS

ALWAYS ENSURE YOU USE HYCOTE PRIMER

- Prevents rust
- Provides a smoother finish
- Base coat for best colour match
- Improved adhesion for top coat

ALWAYS ENSURE YOU USE HYCOTE CLEAR LACQUER OVER METALLICS & PEARLESCENTS

- Protective finish
- Tough & long lasting
- Use two coats

WHY ACRYLIC PAINT?

Most vehicle manufacturers use ACRYLIC paint to provide the ORIGINAL finish to your car bodywork, so naturally **Hycote** uses an ACRYLIC formulation to enable you to obtain the best possible match for your car. These paints are manufactured in our high technology manufacturing plant with every stage of production carefully tested and checked in our quality control laboratories. Hycote Double Acrylic Colour Matched Paints cover the vast majority of cars in one of the most up-to-date ranges available.

ACRYLIC PAINT IS ALSO:

- Tough and hard-wearing
- Quick drying
- Chip resistant
- Fully compatible with old style cellulose paint
- Adheres to most rigid plastics

USING AEROSOLS

- Shake can in a vertical motion until agitator ball is heard and then for a further two minutes
- Apply a series of light coats
- Spray with light even strokes
- Use a side to side motion, alternating up and down
- To prevent blockages turn the aerosol upside down and spray for two seconds between coats and after use

COLOUR VARIATIONS:

Some slight variations may exist due to weather conditions, paint oxidation and manufacturers being unable to maintain shades over a large number of vehicles.

150ml gives the same square metre coverage as a 300ml can*

- Tough and hardwearing
- Quick drying
- Chip resistant
- Concentrated paint
- Enhanced covering power

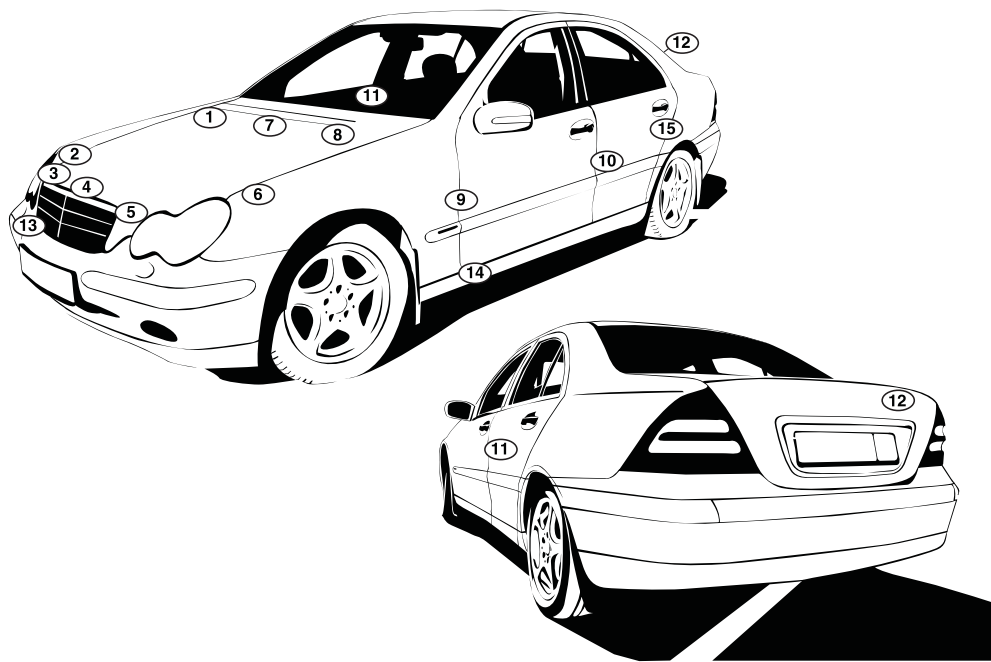

Hycote Double Acrylic Concentrated Paint lasts as long as the big cans, but with less packaging.

Hycote Double Acrylic Colour Matched paints are different to other aerosol spray paints. The formula uniquely uses the propellant as a solvent. This allows a high solid content which in turn provides excellent coverage and a fast drying, high gloss finish. Hycote Double Acrylic Concentrated paint uses the latest resin technology to be compatible with the original paint finish found on modern cars while still being suitable for older, cellulose finishes.

*Based on an average selection of competitor cans
